PATENT AND TRADEMARK OFFICE NOTICES

Recombinant DNA

Suspension of Accelerated Processing of Patent Applications for Recombinant DNA Research Inventions

On January 10, 1977, the Patent and Trademark Office issued a notice, published in the Federal Register of January 13, 1977, 42 FR 2712–2713, which provided for the accelerated processing of patent applications for inventions relating to Recombinant DNA, including those that contribute to safety of research in the field.

In order that the Federal Interagency Committee for Recombinant DNA Research may consider recommendations concerning research conducted by the private sector in this field, that part of the referenced notice dealing with accelerated processing of patent applications for Recombinant DNA research inventions is suspended until further notice.

That part of the referenced notice dealing with accelerated processing of patent applications relating to safety of research in this field will remain in force.

Dated: March 3, 1977.

RENE D. TEGTMEYER,
Acting Commissioner of Patents and Trademarks.

Approved: March 3, 1977.
BETSY ANCKER-JOHNSON,
Assistant Secretary for Science and Technology.

Proposal for Distribution of Trademark Section 8 and 15 Index Cards to Private Firm

The Patent and Trademark Office received a request from TCR Service, Inc. for index cards which indicate the acceptance of an affidavit under Section 8 and the acknowledgment of an affidavit under Section 15. These cards are currently used by the Patent and Trademark Office to update the Search Room records and then the cards are destroyed.

TCR Service, Inc. has agreed that if the Patent and Trademark Office will provide them with the cards, they will maintain the cards for a six month period after receipt and make them available without charge to any person desiring to use them. After six months, the cards will be destroyed.

Any person having an objection to this proposed procedure should notify the Commissioner of Patents and Trademarks within 60 days from the date of this notice. After that time, the Patent and Trademark Office will announce their decision.

BERNARD A. MEANY,
Assistant Commissioner for Trademarks.

Mar. 15, 1977.

Registration to Practice

The following are names of persons applying for registration to practice before the United States Patent and Trademark Office. Information tending to affect the eligibility of said applicants on moral, ethical, or other grounds, should be furnished the Commissioner of Patents and Trademarks on or before May 6, 1977.

PRACTICE BEFORE, AND CORRESPONDENCE WITH, THE PATENT AND TRADEMARK OFFICE

The sections referred to above are being re-written in their entireties, with considerable matter being added in view of the rule changes effective February 1, 1976. The sections as re-written read as follows:

602 *Persons who may practice before Office in trademark matters.*

Rule 2.12. Persons who may practice before the Patent and Trademark Office in trademark cases.

(a) Attorneys at law: Any person who is a member in good standing of the bar of the Supreme Court of the United States or of the highest court of any State, Territory, or the District of Columbia, and is not under any order of any court suspending, enjoining, restraining, disbarring, or otherwise restricting him in the practice of law, may represent others before the Patent and Trademark Office in trademark cases. No application for recognition to practice in trademark cases by attorneys at law is required.

(b) Non-lawyers: Persons who are not attorneys at law as specified in paragraph (a) of this rule are not recognized to practice before the Patent and Trademark Office in trademark cases, except that persons not attorneys at law who were recognized to practice before the Patent and Trademark Office under these rules prior to January 1, 1957, will be recognized as agents to continue practice in trademark cases in the Patent and Trademark Office.

(c) Foreign attorneys and agents: Any foreign attorney or agent not a resident of the United States who shall file proof to the satisfaction of the Commissioner that he is registered and in good standing before the patent or trademark office of the country in which he resides and practices, may be recognized to represent applicants located in such country before the United States Patent and Trademark Office in the presentation and prosecution of trademark applications: *Provided,* That the patent or trademark office of such country allows substantially reciprocal privileges to those permitted to practice in trademark cases before the United States Patent and Trademark Office. Such recognition shall continue only during the period that the conditions specified obtain.

(d) Recognition of any person under this rule is not to be construed as sanctioning or authorizing the performance of any acts regarded in the jurisdiction where performed as the unauthorized practice of law.

(e) No persons other than those mentioned in paragraphs (a), (b), and (c) of this rule will be permitted to practice before the Patent and Trademark Office in trademark cases. Any person may appear for himself, or for a firm of which he is a member, or for a corporation or association of which he is an officer and which he is authorized to represent, if such person, firm, corporation, or association is a party to the proceeding.

(f) Persons otherwise entitled to be recognized to practice under this rule may, nevertheless, be refused recognition for cause.

No application for recognition to practice (that is, to represent others) in trademark cases before the Office is necessary. No examination is given by the Office for eligibility to practice in trademark cases, nor does the Office maintain any register to list persons entitled to practice in connection with trademark cases. Attorneys at law may represent others (that is, practice) before the Patent and Trademark Office

in connection with trademark matters on the basis of their being attorneys at law. Non-lawyers are not permitted to practice except under particular circumstances as specified in Rule 2.12. Firms may not practice as firms or by firm name; only individual persons are entitled to be recognized to practice and represent others.

It is desirable from the viewpoint of both the applicant and the Office that persons who represent parties in trademark cases be attorneys at law, and the rules are designed with that in mind. Use of the term "agent" in connection with a representative in a trademark case is only appropriate under exceptional circumstances as specified in Rule 2.12.

602.01 *Power of attorney not required for attorneys at law.*

It is not necessary for an attorney at law to file a power of attorney or any other special authorization in a trademark case. An attorney at law who is satisfactorily identified as such will be accepted as a representative of a party in a trademark matter on the basis of his being an attorney at law.

If an attorney at law files a power of attorney from the party he represents, such power will be accepted; however, to be acceptable as a power of attorney, the power must identify an individual attorney or individual attorneys by their names, not merely specify the name of a firm of attorneys. A power which specifies the name of a firm of attorneys will not be regarded as a power by the Office; it will merely be treated as a mailing address and a direction that correspondence be sent to such firm at its address. (See TMEP section 603.) The reason for this practice is that an attorney at law in his capacity as a representative is held responsible for his actions under the Code of Professional Responsibility of the American Bar Association, and such Code has applicability to individual persons, not to "firms." (See TMEP section 602.02.)

602.02 *Standards of Conduct, and Signature and Certificate of Attorney.*

Rule 2.13. Professional conduct. Attorneys and other persons appearing before the Patent and Trademark Office in trademark cases must conform to the standards of ethical and professional conduct set forth in the Code of Professional Responsibility of the American Bar Association as amended February 24, 1970, insofar as such code is not inconsistent with these rules. A copy of the said code is available for inspection in the Office of the Solicitor, U.S. Patent and Trademark Office, Room 11C04, Building 3, Crystal Plaza, 2021 Jefferson Davis Highway, Arlington, Va. Copies of the code are available upon request to the American Bar Center, 1155 East 60th Street, Chicago, Ill. 60637.

Rule 2.15. Signature and certificate of attorney or other representative. Every paper filed by an attorney at law or other person representing an applicant or party to a proceeding in the Patent and Trademark Office must bear the signature of such attorney at law or other person except those papers which are required to be signed by the applicant or party. The signature of an attorney at law or such other person to a paper filed by him, or the filing of any paper by him, constitutes a certificate that the paper has been read; that its filing is authorized; that to the best of his knowledge, information, and belief there is good ground to support it; and that it is not interposed for delay.

By amendment of Rule 2.13 as of July 2, 1971, the Code of Professional Responsibility of the American Bar Association is designated by the Office as the standard of conduct for those practicing before the Office in trademark matters. (See 36 F.R. 12616; 890 O.G. TM 60.) The purpose of using the code is to provide a definite and uniform standard of conduct for practitioners before the Office; the code in conjunction with the provision of Rule 2.15 that an attorney or other representative shall sign and thereby certify each action he takes, will eliminate uncertainty as to the person taking the action and the responsibility of such person.

602.03 *Revocation or withdrawal of authorization.*

Rule 2.19. Revocation of power of attorney or of other authorization to represent. Authority to represent an applicant or a party to a proceeding may be revoked at any stage in the proceedings of a case upon notification to the Commissioner; and when it is so revoked, the Office will communicate directly with the applicant or party to the proceeding or with such other qualified person as may be authorized. The Patent and Trademark Office will notify the person affected of the revocation of his authorization.

If a proper written power of attorney has been filed in a trademark application, it may be revoked by applicant by a written revocation, and in such event the Office will acknowledge the revocation and will not thereafter recognize such attorney in that case unless he is again specifically appointed.

However, either with or without a power of attorney on file, a change in representation can be made by an action which is signed by a different properly authorized person plus a request to change the address for correspondence. In this way, decisions as to representation, which are primarily the responsibility of the applicant and his attorney or other representative, are transmitted to the Office without any action normally being needed by the Office. See TMEP section 603.

An attorney at law or other representative can withdraw from representation of an applicant in an application, but such withdrawal should not be done in a manner which would prejudice applicant.

603 *Correspondence, with whom held.*

See Rule 2.18. For amendment of such rule effective February 1, 1976, see 40 F.R. 6361, Feb. 11, 1975 (932 O.G. TM 40, Mar. 11, 1975) and 41 F.R. 756, Jan. 5, 1976 (943 O.G. TM 2, Feb. 3, 1976).

When a trademark application is filed, an address (consisting of a name and a street address) where correspondence from the Office will be sent, is placed on the face of the file wrapper by a clerk in the Office. Correspondence will be sent to any address of applicant's selection, and when the name and address of an attorney appears in the papers, it will be assumed that applicant wishes to receive correspondence from the Office concerning the application at that address. If an application is accompanied by a transmittal letter on a letterhead which identifies an attorney or a firm of attorneys, the name and address on the letterhead will be used as the correspondence address, unless there is included in addition a specific request to "Send correspondence to (a named individual)." If an application is written on professional paper which identifies the name and address of an attorney or a firm of attorneys, such name and address will be placed on the file wrapper as applicant's correspondence address. If a power of attorney designates an attorney or attorneys and an address, or if a form which has the appearance of a power of attorney designates the name and address of a firm of attorneys, such designation will be used as the correspondence address. These entries are made upon the filing of an application, without the signature of the attorney, since an application is a document which must be signed by the applicant and is not an action of the attorney. See Rule 2.15.

The correspondence address which is placed on the file wrapper when the application is filed is not changed unless there is a written request by applicant or his representative to do so. If a power of attorney has been filed, a subsequently filed power of attorney will be regarded as a written request to change the address, even if there is no revocation of the power; but in other situations, specific language is needed which can reasonably be interpreted to be a request to change the address. See TMEP section 602.03. The Office does not acknowledge requests to change the correspondence address; the change is merely entered on the file wrapper by a clerk in the Office. The filing of "associate powers of attorney" or similar papers has no effect; such papers do not alter the correspondence address already established, and such papers are not acknowledged by the Office.

During the prosecution of a trademark application, every action must be signed by an individual attorney or other authorized representative using his individual name, although a firm name might also appear on the action. Any action which is so signed will be accepted regardless of whether the person who has signed is the same person who signed other actions or is different from persons who have signed other actions. Even though the signer is different, however, the Office will continue to send correspondence to the mailing

address already established unless there is a written request to change such address. Thus, if papers are filed by more than one attorney or other representative, the Office will reply but will send the reply to the mailing address already established until there is a written request to change. Double correspondence will not be undertaken either with applicant and applicant's attorney or with more than one attorney or representative. Where circumstances call for it, the Examiner may designate an extra copy of a communication to be sent to a second person, but this procedure will not be repeated on the next communication.

The only action an Examiner need take in relation to attorneys or representatives is to assure that the person who signs each action either is an attorney at law (which normally can be assumed from the attorney's own statement or indentification) or is another proper type of party with written authorization. See Rule 2.17.

IDENTIFICATIONS, AND THE INTERNATIONAL LIST OF GOODS AND SERVICES

The sections referred to above are being rewriten in their entireties in order to clarify the manner in which the International List of Goods and Services is to be used in connection with evaluation of identifications of goods and services in trademark applications and to elaborate on broadness of terms in identifications. The subject matter of the Notice Published in OFFICIAL GAZETTE of August 3, 1971,* dealing with the use of the international list, which was set forth in original TMEP section 804.03, is incorporated in these rewritten sections, and that Notice is superseded by these sections as rewritten.

The re-written sections read as follows:

804.02 *Broadness of terms used in specifying goods and services.*

When setting forth the goods or services in an application, the applicant frequently likes to choose broad terms by which to identify the goods or services. The Office also prefers broad terms, when the terminology is appropriate, in order to avoid long lists of detailed items. Long lists are a burden to the Office to handle and check and they are expensive to print; also they may be unfair to applicants because of being subject to inadvertent omissions and frequent changes in contents. On the other hand, the basis of an application is use of the mark on the goods or services set out in the application. The requirement for use of the mark is not necessarily violated by broad terms, for when a mark is used on a number of items which make up a homogeneous group, a term which identifies the group as a whole would be understood as encompassing products of the same general type which are commercially related. This being true, then, even though a term is broad, it will be known with reasonable certainty what products are intended to be covered, and it will be reasonable from a commercial viewpoint to consider that the mark has been used for all the related products which fall in the designated group. Using this approach, in *In re Port Huron Sulphite & Paper Co.*, 120 USPQ 343 (TT&A Bd. 1959), the term "paper" was approved because of actual use of the mark on various types of papers; in *In re Armstrong Cork Company*, 180 USPQ 335 (TT&A Bd. 1973), "furniture" was not considered too broad to assume use as to all items normally covered by such term; and in *In re Dynamit Nobel AG*, 169 USPQ 499 (TT&A Bd. 1971), "ammunition" was permitted because its scope was assumed to be understood.

In considering all identifications, but especially the appropriateness of broad terms, the Examiner must consider the following guidelines:

(1) A term which clearly includes particular items which are classified in more than one class is not acceptable. (For example, "artists' materials.")

(2) A term which is too indefinite to enable proper examination to be made would not be acceptable. (For example, "metallic parts.") In such a situation the Examiner may seek further information under Rule 2.61(b). See TMEP sections 1105.02 and 1105.02(a).

(3) An identification would be unacceptable if it were inconsistent with the goods or services disclosed by the specimens, or if the ordinary meaning of the identification were at variance with the goods or services disclosed by the specimens or otherwise disclosed by the record. (For example, "decalcomanias" are not adequately identified by the term "publications." See also *Ex parte Consulting Engineer Publishing Co.*, 115 USPQ 240 (Comr. Pats. 1957).)

(4) Wording included in a mark could require limitation of the identification. (For example, "beer" may not be included in the identification where the mark is "Newark 'Olde Town' Ale." *Ex parte The Consumers Brewing Co.*, 55 USPQ 426 (Comr. Pats. 1942). But see also TMEP section 404.04(e) for circumstances under which limitation would not be necessary.)

(5) The mere fact that a decision (or decisions) holds that a likelihood of confusion exists in relation to certain narrowly identified items does not necessarily mean that all broad identifications which would include such items must be amended to the specific narrow items mentioned in the decision or decisions.

(6) An identification which can be understood when read in association with the title of the class in which it is placed and is otherwise satisfactory, should not be required to be further qualified by amendment. (For example, "muffers" in the clothing class would not require further modification to indicate that articles of clothing are intended; similarly the term "house organ" in the class for printed publications would not need further qualification.) See TMEP sections 1401.07 and 1401.08.

With broad identifications, as with any identification which includes more than one item, there is a question as to the amount of proof (normally by way of specimens) which is necessary to assure the Examiner that the mark has been used on "all" the items in the application. See TMEP sections 808.01(a) and 804.06. It has never been the practice of the Office to require specimens of use for every item in an application. Consideration is given to the fact that applicant has stated that the facts set forth in the application are true, and also to the degree of commercial relationship between the products. With broad terms which identify a group of products which are similar and consistent in their commercial character, it is reasonable to assume that even if the mark has not been used on every item in the group, use on some of the items would be likely to result in confusion with regard to the other items. For a closely related group, a specimen on one item of the group would be sufficient. As the closeness of the relationship becomes less certain, specimens of use on more than one item might be necessary to be persuasive of generalized use. The nature of the mark also may be considered, for it is so well known as not to require proof that "house" marks are in fact placed on all the goods which a company produces, whereas a "product" mark which is appropriate only for a specific commodity is used only on that commodity.

The appropriateness of any broad identification depends upon the facts in the particular case, but use of terms as broad as the circumstances justify is desirable. When an ap-

(NOTE.—These sections as changed will be incorporated into the Manual text in Rev. 3 of the Manual.)

*This Notice as originally published was entitled "Preface to the Trademark C.G. Notices," with a sub-headed portion entitled "Identification of Goods and Services in Trademark Applications." The Notice was first issued under data of June 16, 1971 and first printed in 36 Fed. Reg. 13232, July 16, 1971, and in the OFFICIAL GAZETTE of August 13, 1971 (889 O.G. TM 2). That portion of the Notice sub-headed "Identification of Goods and Services in Trademark Applications" was re-issued under date of January 13, 1972 with an amendment of the part pertaining to fees for the international list, and as amended was reprinted in the OFFICIAL GAZETTE of February 8, 1972 (895 O.G. TM 54).

propriate broad term is available, it should be used by applicant and accepted by the Examiner.

Any uncertainly as to the acceptability of the terms in identifications should be first discussed with the Division Supervisor, and if unresolved, should be submitted for the decision of the Director of the Trademark Examining Operation, who may delegate the everyday responsibility for resolving these questions to the Examiner who is responsible for classification matters. The Classification Examiner is also authorized to discuss with Supervisors and Examiners situations which the Classification Examiner observes during review of the applications which have been forwarded for publication. A list of terms which as a result of these procedures have been considered to be acceptable under suitable circumstances, will be compiled and made available to Examiners and the public, whenever practicable.

Final refusals based on a requirement concerning identifications of goods or services must be reviewed by the Director of the Trademark Examining Operation so as to achieve the highest uniformity.

804.03 *International alphabetical list as guide.*

In furtherance of the guidelines set forth in TMEP sections 804.01 and 804.02, Examiners should use as a reference for identifications of goods and services, the items listed in the Alphabetical List of Goods and Services which is contained in the volume entitled "International Classification of Goods and Services to Which Trademarks Are Applied" (published by the World Intellectual Property Organization, also known as WIPO). The items in the list should be accepted as identifications whenever circumstances permit. A great many of the items will be sufficiently definite to be acceptable. However, in view of the fact that the terms in the present list were developed essentially as a basis for classifying goods and services and not from the viewpoint of proper form to serve as identifications of specific goods and services, some items may not be sufficiently definite. The list itself indicates at its beginning that it should not be assumed that every item will be a suitable identification as it stands.

The primary purpose of using the international Alphabetical List as a reference for identifications is to provide a published source of names of goods and services to which applicants can resort with some degree of assurance that the terms will be accepted by Examiners in the Patent and Trademark Office. The availability of such a source should help reduce and simplify the requirements of Examiners as to identifications of goods and services, and should be of assistance in establishing justifiably broad identifications, thereby shortening prosecution time and reducing unconstructive discussion.

The principles for determining the degree of definiteness needed in identifications in order to permit proper examination (see TMEP sections 804.02 and 804.04) are to be applied to all terminology whether it is in the international Alphabetical List or not. However, items which appear in the international Alphabetical List should be given the benefit of any doubt and should be accepted whenever that can reasonably be done, in the interest of establishing the list as a source of satisfactory identifications.

See *In re Safeway Products Inc.*, 192 USPQ 155 (TT&A Bd. 1976); *In re Air Products and Chemicals, Inc.*, 192 USPQ 84 (TT&A Bd. 1976), on reconsideration 192 USPQ 157 (TT&A Bd. 1976).

804.04 *Need for greater definiteness in identifications of goods and services.*

Whenever after applying the guidelines in TMEP sections 804.01, 804.02 and 804.03 as to broadness in identifying goods and services, the Examiner considers it necessary to request a more definite identification, the Examiner should explain clearly but concisely the reason for the request. See TMEP sections 1105.02 and 1105.02(a). Some well-recognized reasons for requesting a more definite identification are set out in the sub-sections of this section.

804.04(a) *More than one class involved.*

If a broad term used by applicant clearly includes particular items which are classified in more than one class in the Classification of Goods and Services, the term must be amended to limit the items to one class. An example of such a term would be "artists' materials." Another example would be the designation "tables," which would include such diverse and differently classified types as operating tables, draftsmen's tables and dining tables. However, the conclusion that a term would clearly include particular items which are classified in more than one class should be reasonable in the light of commercial relationships between goods or services. For example, see the terms "paper," "furniture" and "ammunition," in *In re Port Huron Sulphite & Paper Co.*, 120 USPQ 343 (TT&A Bd. 1959); *In re Armstrong Cork Company*, 180 USPQ 335 (TT&A Bd. 1973); and in *In re Dynamit Nobel AG*, 169 USPQ 499 (TT&A Bd. 1974), respectively. In each of these cases the terms might seem to include certain items classified elsewhere but in fact such items are so specialized in character that they are not generally understood as being included in the broad term.

A filing fee is required for each class, and only goods classified in the designated class may be included. Rule 2.86.

For combining classes in one application, see Rule 2.87 and TMEP section 1113.

804.04(b) *Lack of clarity.*

If a term is so vague or indefinite that what it is intended to identify cannot be understood, and proper examination is hindered, the term must be amended to be sufficiently clear. An example would be the term "metallic parts." An instance is also found in *In re Societe des Parfums Schiaparelli*, 122 USPQ 349 (TT&A Bd. 1959), where clarification of the term "beauty products" was held to be necessary because the term does not have a commonly understood meaning as referring to a known and commercially related group of items. In making inquiry, refer to Rule 2.61(b) and TMEP section 1105.02.

804.04(d) *Inaccuracy.*

If the identification is inconsistent with the goods or services which are indicated by the specimens, or if the ordinary meaning of the language of the identification designates goods or services which would be at variance with what is disclosed by the specimens or any other part of the record, amendment to make the identification accurate will be necessary. For example, "decalcomanias" are not adequately or accurately identified by the term "publications." In *In re Toro Manufacturing Corporation*, 174 USPQ 241 (TT&A Bd. 1972), where the goods were a specialized article known as "grass-catcher bags for lawn-mowers," such use did not justify the broad term "bags" which would encompass goods diverse from and commercially unrelated to applicant's specialized article. See also *Merchanising Promotions* v. *Hastings & Co., Inc.*, 110 USPQ 256 (Comr. Pats. 1956); *Kickhaefer Corporation* v. *Willys-Overland Motors, Inc. etc.*, 111 USPQ 105 (CCPA 1956), "internal combustion engine" amended to "outboard motor;" *Ex parte Consulting Engineer Publishing Co.*, 115 USPQ 240 (Comr. Pats. 1957), "periodical" amended to "monthly news bulletin;" *Nopco Chemical Company* v. *Kay-Fries Chemicals, Inc.*, 124 USPQ 113 (TT&A Bd. 1960); and *In re Samuel M. Gertman Co., Inc.*, 180 USPQ 336 (TT&A Bd. 1973), "fresh dressed poultry" amended to "frozen ready to eat poultry."

Guidelines for Implementation of Recently Revised Rules

Recently a number of rules relating to Patent Examining and Appeal Procedures were revised. The new rules were published in the Federal Register at 42 F.R. 5588 on January 28, 1977, and in the OFFICIAL GAZETTE at 955 O.G. 1054 on February 22, 1977. The following guidelines are being published to describe the procedures which are being followed in implementing 37 CFR sections 1.11, 1.97–1.99, 1.109, 1.194, 1.291 and 1.292.

Files Open to the Public

Section 1.11(b) is applicable only to those reissue applications filed on or after March 1, 1977. Those reissue applications already on file will not be automatically open to inspection but a liberal policy will be followed by the Office of the Solicitor in granting petitions for access to such applications.

(NOTE.—These sections as changed will be incorporated into the Manual text in Rev. 3 of the Manual.)

For those reissue applications filed on or after March 1, 1977, the following procedure will be observed:

1) The filing of reissue applications will be announced in the OFFICIAL GAZETTE and will include certain identifying data as specified in section 1.11(b). Any member of the general public may request access to a particular reissue application filed after March 1, 1977. Since no record of such request is intended to be kept, an oral request will suffice.
2) The reissue application files will be maintained in the examining groups and inspection thereof will be supervised by group personnel. Although no general limit is placed on the amount of time spent reviewing the files, the Office may impose limitations, if necessary, e.g., where the application is actively being processed.
3) Where the reissue application has left the examining group for administrative processing, requests for access should be directed to the appropriate supervisory personnel in the Division or Branch where the application is currently located.
4) Requests for copies of papers in the reissue application file must be in writing addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231 and may be either mailed or delivered to the Office mailroom. The price for copies made by the Office is thirty cents per page.

Prior Art Statements

This notice supersedes the notices of August 12, 1974 (926 O.G. 2) and May 19, 1975 (935 O.G. 902) relating to citations of prior art. Although new sections 1.97 through 1.99 are not effective until July 1, 1977, and are not mandatory upon applicants, they provide an ideal mechanism for complying with the duty of disclosure under 37 CFR 1.56. The statements should be submitted in accordance with the following guidelines:

1) Prior art statements should be submitted at the time of filing the application or within three months thereafter and may be separate from the specification or incorporated therein. The statement shall serve as a representation that the person preparing it has included therein what he believes to be the closest prior art of which he is aware and shall not be construed as a representation that no better art exists or that a search has been made. If the first action in the application is received prior to three months after filing of the application and no prior art statement has been submitted, the prior art statement may be submitted with the response to the first action and be considered timely.
2) The statement shall include a listing of the patents, publications or other information which the preparer of the statement wishes to cite and a concise explanation of the relevance of each listed item. Copies of the pertinent portions of all listed documents shall be supplied along with the statement, both when incorporated into the specification and when filed separately. If two or more patents or publications considered material are substantially identical, a copy of a representative one shall be included with the statement and others may merely be listed with an indication of which are considered to be substantially identical.
3) A translation of the pertinent portions of foreign language patents or publications considered material should be transmitted if an existing translation is readily available to the applicant. It will be sufficient, however, to transmit an equivalent English language patent or publication so long as it is identified as an equivalent.

Where the applicant has submitted copies of prior art in accordance with these guidelines in a prior application, reference to the prior application and the submission therein will be sufficient for the continuing application as far as the copies are concerned. As far as the statement per se is concerned, the relevance of the prior art to the claimed subject matter must be indicated if it differs from its relevance as explained in the prior application.

4) If prior to the issuance of a patent an applicant, pursuant to his duty of disclosure under 37 CFR 1.56, wishes to bring to the attention of the Office additional patents, publications or other information not previously submitted, the additional information should be submitted to the Office with reasonable promptness. It may be included in a supplemental prior art statement or may be incorporated into other communications to be considered by the examiner. Any transmittal of additional information shall be accompanied by explanations of relevance and by copies in accordance with the requirements aforementioned. The transmittal should include a statement explaining why the prior art was not earlier submitted.

While the Patent and Trademark Office will not knowingly ignore any prior art which might anticipate or suggest the claimed invention, no assurance can be given that cited art or other information not submitted in accordance with these guidelines will be considered by the examiner.

After the claims have been indicated as allowable by the examiner, e.g., by the mailing of an Ex parte Quayle action, a notice of allowability (PTOL-327), an examiner's amendment (PTOL-37), or a Notice of Allowance (PTOL-85), any citations submitted will be placed in the file. Since prosecution has ended, however, such submissions will not ordinarily be considered by the examiner unless the citation is accompanied by:

(a) A proposed amendment cancelling or further restricting at least one independent claim and narrowing the scope of protection sought;
(b) A timely affidavit under 37 CFR 1.131 with respect to the material cited; or
(c) A statement by the applicant or his attorney or agent that, in the judgment of the person making the statement, the prior art or other information cited raises a serious question as to the patentability of the claimed subject matter, or is closer prior art than that of record.

If the material is submitted after the base issue fee has has been paid, it must also be accompanied by a petition under 37 CFR 1.183 requesting a waiver of 37 CFR 1.312. Such petition, if granted, would result in review of the art by the examiner and possible entry of the amendment.

In each instance where an examiner considers, but does not cite on form PTO-892, specific prior art referred to in a paper placed in the application file, the examiner will place a notation adjacent to the reference according to the following:

If included in the specification, the examiner will write his or her initials adjacent to any references checked and enter "checked" in the left margin opposite the initials. If presented in a separate paper or in the remarks of an amendment, the examiner's initials and "checked" will be entered adjacent to the citations or wherever possible to indicate clearly those checked.

Reasons for Allowance

One of the primary purposes of the change in Section 1.109 is to improve the quality and reliability of issued patents by providing a complete file history which should clearly reflect, as much as is reasonably possible, the reasons why the application was allowed. Such information facilitates evaluation of the scope and strength of a patent by the patentee and the public and may help avoid or simplify litigation of a patent.

The practice of stating the reasons for allowance is not new and the rule merely formalizes the examiner's existing authority to do so and provides applicants an opportunity to comment upon any such statement of the examiner.

When the examiner determines that it is necessary or desirable, a "Statement of Reasons for Allowance" will be prepared. The "Statement" will usually be an attachment to either a notice of allowability (PTOL-327) or Examiner's Amendment (PTOL-37). Any comments considered necessary by applicant must be submitted no later than the issue fee and should preferably *accompany* the issue fee. Submission with the issue fee avoids any delay in the processing of the application and avoids the necessity to associate the comments with the application while it is in issue except at

the time the file must be pulled to record the payment of the issue fee. Such comments will be entered in the application file by the Allowed Files Branch with an appropriate notation on the "contents" list of the file wrapper, but will not be reviewed by the examiner.

Oral Hearings Before Board of Appeals

Section 1.194 clarifies the circumstances in which oral hearings should be requested and provides for oral arguments by, or on behalf of, primary examiners in certain appeals.

Under Section 1.194, the following procedures will be in effect:

1) In accordance with Section 1.192, appellants who desire an oral hearing must request the same at the time of filing the appeal brief.
2) If appellant has requested an oral hearing and the primary examiner intends to present an oral argument, the last paragraph of the examiner's answer will indicate this intention.
3) Notice of the oral hearing will be given to the appellant and, at the same time, to the primary examiner in those cases in which the primary examiner has indicated an intention to present an oral argument.
4) After an oral hearing has been confirmed and the date set as provided in Section 1.194(c), the application file will be delivered to the examiner via the appropriate Group Director at least one week prior to the date of the hearing for those cases in which the examiner is expected to be present at the hearing. In those cases where the Board requests the presentation of an oral argument by, or on behalf of, the primary examiner, the appellant will be so notified. The Board's request for an oral argument may, where appropriate, indicate specific points or questions to which the argument should be particularly directed. The application file wil be returned to the Board before the hearing.
5) In those appeals in which an oral hearing has been confirmed and either the primary examiner or the Board has indicated a desire for oral argument, such oral argument may be presented whether or not appellant appears.

Protests and Public Use Proceedings

Amended sections 1.291 and 1.292 give greater recognition to the value of written protests and public use petitions and are intended as an aid in avoiding the issuance of invalid patents.

Under sections 1.291(b) and (c) and 1.292(b), the following procedures will be observed:

1) Only in those instances where it has not been possible to serve protest papers upon the applicant, attorney or agent should duplicates of the papers submitted be provided. In this case the appropriate examining group will attempt to get the duplicate copy to the applicant, attorney or agent. However, every effort should be made by the protester to effect service.
2) Citations of prior art and any papers related thereto may be entered in the file after a patent has been granted by submitting them to the attention of the Record Room, where they will be entered without comment by the Office. If after diligent effort it has not been possible to serve the prior art citations and related papers on the patentee, his attorney or agent, duplicate copies should be submitted in which case the Record Room will attempt to get the duplicate copy to the owner of record.
3) When public use petitions and accompanying papers are submitted they, or a notice in lieu thereof, will be entered in the application file. Duplicate copies should be submitted only when, after diligent effort, it has not been possible for petitioner to serve a copy of the petition on the applicant, his attorney or agent in which case the Office of the Solicitor will attempt to get the duplicate copy to the applicant, his attorney or agent.
4) To ensure consideration by the examiner, protests should be timely submitted, i.e., before final rejection or allowance. Consideration of protests filed after final rejection or allowance will depend upon the relevance of the prior art documents and the point in time at which they are submitted. Documents which clearly anticipate or render obvious one or more claims will not knowingly be ignored. If protests are not timely submitted or if they fail to comply with section 1.291(a) as to the submission of a copy of each prior art document relied upon, they will be acknowledged and referred to the examiner having charge of the subject matter involved for entry in the application file and such consideration as seems warranted.

In each instance where an examiner considers but does not cite on form PTO–892 specific prior art referred to in a protest, the examiner will place a notation in the protest paper adjacent to the reference which will include his or her initials and the term "checked."

Additional future guidelines as to protest procedures may be developed after gaining experience with the new practice.

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See Rules 2.101 to 2.105.

A separate fee of twenty-five dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sept. 1, 1973 rather than the international class which applies to applications filed on and after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of June 26, 1973 (911 O.G. TM 210).

SN 52,897. Ingenieursbureau Voor Industrie Service (I.B.I.S.) B.V., The Hague, Netherlands. Filed May 21, 1975.

ICOLIN

Priority claimed under Sec. 44(d) on Reg. No. 330,280, dated Jan. 14, 1975.
For Synthetic Resin Products for Industrial Use (U.S. Cl. 1).

SN 59,496. Halliburton Company, Duncan, Okla. Filed Aug. 4, 1975.

TRI-S

For Sandstone Surfactant Composition for Use in the Treatment of Silica and Clay-Containing Oil and Gas Wells (U.S. Cl. 6).
First use July 10, 1975.

SN 65,897. Johns-Manville Corporation, Denver, Colo. Filed Oct. 14, 1975.

CHROMOSORB

Owner of Reg. No. 661,491.
For Diatomite Based and Polymer Based Support Materials and Adsorbents for Chromatography (U.S. Cl. 6).
First use at least on or about Apr. 24, 1957.

SN 69,474. Bayer Aktiengesellschaft, Leverkusen-Bayerwerk, Germany. Filed Nov. 18, 1975.

BLANCOROL

Owner of German Reg. No. 479,644, dated June 28, 1935.
For Leather Tanning Agents (U.S. Cl. 6).

SN 71,419. Henkel Inc., Teaneck, N.J. Filed Dec. 10, 1975.

QUATRENE

For Surface Active Agents and Inhibitors of Hydrogen Sulfide-Producing Bacteria Causing Corrosion (U.S. Cl. 6).
First use June 18, 1959.

SN 71,839. Velsicol Chemical Corporation, Chicago, Ill. Filed Dec. 15, 1975.

POLYVEL

Owner of Reg. No. 710,437.
For Hydrocarbon Polymer of Petroleum Origin Having Use in Adhesives, Inks and Coatings (U.S. Cl. 1).
First use Nov. 3, 1975.

SN 72,532. Exxon Corporation, Flemington, N.J. Filed Dec. 22, 1975.

ESCOPOL

For Petroleum Derived Resins (U.S. Cl. 1).
First use Nov. 12, 1975.

SN 74,237. C. J. Patterson Company, d.b.a. Patco Products, Kansas City, Mo. Filed Jan. 14, 1976.

SOF-ONE

Owner of Reg. No. 952,195.
For Additive Used as a Conditioner and Softener in the Preparation of Dough (U.S. Cl. 46).
First use during August 1973.

SN 74,709. Propper Manufacturing Co., Inc., Long Island City, N.Y. Filed Jan. 19, 1976.

DUO-SPORE

For Indicators for Monitoring the Effectiveness of Sterilization Procedures (U.S. Cl. 6).
First use Nov. 3, 1975.

SN 75,094. Thiokol Corporation, Newtown, Pa. Filed Jan. 23, 1976.

HC

For Liquid Polymer for Use as a Binder for Composite Solid Propellants or as a Rocket Motor Case Liner for Bonding Solid Propellant to the Motor Case, for Use in Connection With Rocket Technology (U.S. Cl. 6).
First use Jan. 22, 1973.

SN 75,195. Atlantic Richfield Company, Los Angeles, Calif. Filed Jan. 26, 1976.

ARCOTREAT

For Chemical Used in Conjunction With the Drilling, Cleaning, or Treatment of Oil and Gas Wells, Specifically Water-in-Oil Emulsion Breakers and Oil-in-Water Emulsion Breakers (U.S. Cl. 6).
First use May 31, 1968.

SN 75,196. Atlantic Richfield Company, Los Angeles, Calif. Filed Jan. 26, 1976.

ARCOHIB

For Chemical Used in Conjunction With the Drilling, Cleaning, or Treatment of Oil and Gas Wells, Specifically a Corrosion, Scale and Paraffin Inhibitor (U.S. Cl. 6).
First use May 31, 1968.

SN 75,197. Atlantic Richfield Company, Los Angeles, Calif. Filed Jan. 26, 1976.

ARCOBASE

For Chemical Used in Conjunction With the Drilling, Cleaning, or Treatment of Oil and Gas Wells, Specifically a Liquid for Use To Formulate Foamers, Emulsifiers, Degreasers, Dispersants, Detergents and Inhibitors (U.S. Cl. 6).
First use Sept. 13, 1968.

SN 75,236. G. D. Searle & Co., Skokie, Ill. Filed Jan. 26, 1976.

NCS

For Tissue Solubilizer (U.S. Cl. 6).
First use at least as early as 1967.

SN 76,162. Shipley Company Inc., Newton, Mass. Filed Feb. 4, 1976.

SHIPLEY

For Chemicals Used for Electroless Metal Plating and Light Sensitive Chemicals for Use as Photoresist Materials in Selective Electroless Metal Plating and Chemical Milling (U.S. Cl. 6).
First use April 1957.

SN 79,187. Waters Associates, Inc., Milford, Mass. Filed Mar. 4, 1976.

PIC

For Chemical Reagents Useful in Liquid Chromatographic Analysis (U.S. Cl. 6).
First use on or before Jan. 20, 1976.

SN 79,817. Ecodyne Corporation, Lincolnshire, Ill. Filed May 19, 1976.

RADEX

For Ion Exchange Resins (U.S. Cl. 1).
First use at least as early as Sept. 18, 1975.

SN 82,650. Hexcel Corporation, Dublin, Calif. Filed Apr. 5, 1976.

SLIP QUICK

The term "Slip" is disclaimed apart from the mark as shown.
For Fatty Acid Amide Type Composition for Use as an Anti-Tack and Slip Agent Additive in Plastics Compositions (U.S. Cl. 6).
First use on or about June 8, 1971.

SN 83,244. Drew Chemical Corporation, Parsippany, N.J. Filed Apr. 9, 1976.

DREWSPERSE

For Antifoulants, Dispersants, Antiprecipitating Agents for Liquid Systems (U.S. Cl. 6).
First use December 1964.

SN 84,044. Kao Soap Company Limited, Chuo-ku, Tokyo, Japan. Filed Apr. 15, 1976.

MIGHTY

For Additives for Concrete (U.S. Cl. 6).
First use Nov. 21, 1973; in commerce Nov. 21, 1973.

SN 85,349. Ornsteen Chemicals, Inc., Seabrook, N.H. Filed Apr. 28, 1976.

SUPER DROP

Applicant disclaims the word "Drop" apart from the mark as shown.
For Cyanoacrylate Adhesives (U.S. Cl. 5).
First use on or about Mar. 22, 1976.

SN 85,403. The Lea Manufacturing Company, Waterbury, Conn. Filed Apr. 28, 1976.

LEABOND

Owner of Reg. No. 786,616.
For Polishing Wheel Cement (U.S. Cl. 6).
First use at least as early as October 1974.

SN 86,525. Conley Corporation, Tulsa, Okla. Filed May 10, 1976.

CONLEY-WELD

For Epoxy Adhesives (U.S. Cl. 5).
First use Apr. 15, 1954.

SN 86,666. Conley Corporation, Tulsa, Okla. Filed May 10, 1976.

ESTERWELD 330

For Adhesive Preparation Used in Connection With Piping Systems (U.S. Cl. 5).
First use Jan. 6, 1972.

SN 86,667. Conley Corporation, Tulsa, Okla. Filed May 10, 1976.

C-WELD

For Adhesives for Fiberglass (U.S. Cl. 5).
First use Mar. 2, 1975.

SN 87,835. Sensuous Plant Company, Lancaster, Calif. Filed May 20, 1976.

PLANT CHAMPAGNE

No registration rights are claimed for the word "Plant" apart from the mark shown, but the applicant waives none of its common law rights in the mark shown or any feature thereof.
For Bottled Water for Plants (U.S. Cl. 1).

The mark consists of a fanciful lowercase "h" and a superimposed array of three circles. The stippling of the drawing is not intended to represent color and is not a feature of the mark.
For Compound and Media for Use in Vibratory Finishing Machines (U.S. Cl. 6).
First use June 20, 1973.

SN 89,302. American Cyanamid Company, Wayne, N.J. Filed June 4, 1976.

ACCOSIZE

Owner of Reg. Nos. 631,555, 924,564, and others.
For Synthetic Size Useful in the Paper Industry (U.S. Cl. 6).
First use Mar. 3, 1976.

SN 91,000. Michael E. Parobek, d.b.a. M. E. Parobek & Associates, Alhambra, Calif. Filed Apr. 22, 1976.

For Fertilizers and Soil Builders (U.S. Cl. 10).
First use Mar. 11, 1975.

SN 91,280. Jersey Industrial Chemical Products Inc., Livingston, N.J. Filed June 23, 1976.

SCALITE

For Boiler Water Treatment Chemicals for Preventing Scale and Corrosion (U.S. Cl. 6).
First use Apr. 1, 1953.

SN 91,723. Rhodia, Inc., New York, N.Y. Filed June 28, 1976.

LAUTIAL

Owner of Reg. No. 931,216.
For Chemical Compositions Used in the Manufacture of Perfumery and Toilet Preparations (U.S. Cl. 6).
First use June 17, 1976.

SN 92,829. Wilkinson Chemical Corporation, Mayville, Mich. Filed July 8, 1976.

WCC 1·26

For Garden Tractor Tire Fill (U.S. Cl. 6).
First use May 12, 1976.

SN 94,472. National Distillers and Chemical Corporation, New York, N.Y. Filed Aug. 6, 1976.

MGN

For Methylene Glutaronitrile for Use in the Industrial Arts Such as an Intermediate, a Monomer and a Comonomer (U.S. Cl. 6).
First use at least as early as Oct. 12, 1964.

SN 95,294. Imperial Chemical Industries Limited, Millbank, London, England. Filed Aug. 2, 1976.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sept. 1, 1973 rather than the international class which applies to applications filed on and after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of June 26, 1973 (911 O.G. TM 210).

TRADEMARK REGISTRATIONS CANCELED

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sept. 1, 1973 rather than the international class which applies to applications filed on and after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of June 26, 1973 (911 O.G. TM 210).
